

PALAK AGRAWAL | Product Designer | UX/UI designer

Delhi • +91-9050506545 • palakagrawal3623@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Product Designer with experience in enterprise SaaS, mobility systems, and AI-first hiring platforms. I design scalable systems that balance user behavior, business goals, and operational complexity across digital products. Strong focus on UX strategy, design systems, and multi-stakeholder product ecosystems.

EDUCATION

Bachelor of Design - (Communication Design) | UI/UX Specialization, NIFT Gandhinagar | CGPA: 8.6 Expected August 2026

12TH CBSE (PCM), DAV Public school, Faridabad | CGPA: 8

10TH CBSE, GPPS, Palwal | CGPA: 10

CERTIFICATION

Executive Program in Product Management with Applied AI, IIT Roorkee | CGPA: 9.2

Expected June 2026

Google UX Design Professional Certificate, Coursera, March 2025

WORK EXPERIENCE

Product Design Intern, Chitragupta Urban Tech, Bangalore (Dec 2025 – April 2026)

AI-powered urban intelligence platform leveraging computer vision on video captured from vehicle-mounted cameras to detect infrastructure issues, potholes & road breakers, manholes, streetlights, illegal hoardings, and property tax compliance.

Urban Intelligence SaaS Platform Flagship Product, Design System & Rebrand

- Designed the flagship analytics platform tracking **5M+ infrastructure defects across 5+ Indian cities and 20+ civic services** live geographic dashboards, video-evidenced ticketing, engineer performance analytics, and city-level accountability views.
- Grounded the product in structured UX research: stakeholder workflow mapping, multi-role persona development, user flows, and information architecture for complex multi-stakeholder operations (field engineers, city admins, govt officials).
- UX audited **16 fragmented internal and external platforms** and led a consolidation strategy **reducing 16 platforms to 10 unified SaaS products** cutting duplicated workflows, tool-switching friction, and management overhead cost.
- Built a **scalable design system with 800+ variables, 60+ components supporting 10 platforms**. and a comprehensive token architecture (color, typography, iconography, data-viz, dark/light) powering consistency across the enterprise suite.
- Led a **full rebrand and visual identity refresh**- new logo system, color palette, and brand language and extended it into the **Chitragupta's brand website** and public marketing surfaces.

Goa Mazhi Taxi : Govt of Goa Taxi Platform (Driver App)

- Designed the driver-facing platform serving **30,000+ Goa taxi drivers** under a govt-backed initiative navigating **multiple driver unions, tourist-season volatility, and long-standing regulatory tensions** around taxi pricing and access.
- Introduced **digital queue management, fleet operations, and earnings transparency** transforming a messy **15+ year-old analog taxi system** into a customized digital platform that feels local-first, balancing govt stakeholder needs with on-the-ground driver usability.

UX/UI Design Intern, Ainterviews.com, Gurugram, (Oct 2025 – Nov 2025)

- Designed an **AI-moderated design-thinking assessment for Lenskart** (Ainterviews' flagship client) measuring **Applied Design Thinking, Decision Intelligence, and AI Collaboration Behavior** keeping the core abilities for hiring designers and PMs in an AI-first era.
- Built an **intentionally constrained AI canvas**, scoring rubric, and candidate + examiner interfaces; usability-tested and architected a **scalable backend** to run the format for all the clients of Ainterviews.

UX/UI Design Intern, Wugweb UX Agency, Noida (Jun 2025 – Aug 2025)

- Audited agency client sites **IKan (Talent mobility)** and designed a **high-converting book landing page** for a debut author fixing usability/conversion gaps and structuring narrative hierarchy, CTAs, and social proof.
- Led early product thinking on an **Axis Bank redesign**, structuring UX flows and interaction architecture across front-end consumer journeys and back-end operational workflows; collaborated with engineering on feasibility and dev handoff.
- Designed **brand, marketing, and commerce surfaces for the agency's own website**, extending the brand language into a production-ready public-facing experience.

SKILLS

UX Thinking	UI Execution	Product & Collaboration	Tools
• User Research • Usability Testing • Heuristic Evaluation • Observation Studies • Surveys • Interviews • Design Thinking • Problem Framing • User-Centered Design • Journey Mapping • Persona Building • User Flows • Information Architecture • Jobs To Be Done • Behavioral Mapping • Service Design • Systems Thinking • Product Strategy • Decision Intelligence	• Wireframing • Prototyping • Interaction Design • Visual Design • UI Design • Responsive Design • Mobile-first Design • Typography • Color Theory • Design Systems • Component Libraries • Token Systems • Accessibility • Motion Thinking • Microinteractions • Dashboard Design • Data Visualization	• Product Design • Product Thinking • Business Understanding • KPI Thinking • Funnel Thinking • Conversion Optimization • A/B Thinking • Agile Methodology • Dev Handoff • Design QA • Stakeholder Management • PM Collaboration • Engineering Collaboration • Prioritization • Tradeoff Decision Making • AI-assisted Workflows • Experimentation Thinking • Scalable Systems	Figma Notion, Miro Adobe suite Claude Mixpanel HTML/CSS

ACCOMPLISHMENTS

- **IFFTI Conference, Seoul** – Internationally recognized research poster, **User-Centered Robo-Textile Design for Kilirobot** (assistive robot supporting children with Autism Spectrum Disorder); selected among **1,000+ global submissions** and showcased at the 26th IFFTI Annual Conference on Fashion Towards Post-Humanism, Ewha Womans University.
- **Published Research, Vastrashilpakosh** – Paper on the **Bobbin Lace Craft of Tamil Nadu**, recognized for its contribution to preserving and promoting India's traditional textile heritage.
- **GMUN, HREC Committee** – **Special Mention** representing Brazil in the Human Rights & Environment Committee; co-sponsored a passed resolution advocating for the rights of the Rohingya community.

KEY ACADEMIC PROJECTS

Solving the problem of UPI payment fraud in Indian Autos, *UX Research | Design Research*

- Conducted **mixed-methods research** combining observation study across real autos, in-depth **driver & passenger interviews**, and a quantitative survey (key findings: **81%, 68%, 77%** across reliability, visibility, and scan-intent signals).
- Prototyped and field-tested **7 placement variations (A–G)** in real autos; mapped behavioral flow differences between drivers and passengers, and established a design-criteria rubric grounded in contextual Indian micro-mobility behavior.

FocusRead Web Extension, *Product Design | Web Development*

- Designed and shipped a **working Chrome extension** that boosts reading comprehension by reducing on-page visual noise and mimicking natural text-selection patterns to sustain reader attention.
- Owned end-to-end delivery — user needs, interaction design, visual system, and **front-end implementation** (HTML / CSS / JavaScript).
